

# **PTSD Home Pilot Study**

**R e s o n a . H e a l t h**

**The entire universe and everything in it vibrates at unique frequencies that determine what it is and how it behaves.**

**Your world is made up entirely of frequencies.**

**So are you.**

**You can apply frequencies to your body and “tune” it back to its natural frequencies when it gets out of harmony.**

**Health is truly harmonious.**

## Overview

Resona Health produces ultra-low frequency devices for people & pets for some of our most common ailments. The frequencies can not be felt by most people (or pets). The devices work by resonance with the water in your body and your body's cells. The cells in your body have an electrical charge and can get run down over time. The frequencies recharge your battery and allow your body to heal itself. The device does not make any noticeable noise, it simply puts out low energy magnetic waves.

### **How do you get to participate?**

First decide you want to. This is a small choice considering the potential benefit, yet like all studies we only want individuals that are willing to make the commitment to themselves and us and will promise to use the device and report the results. To participate in the study, please watch the 10-min orientation video then decide to sign-up. You will receive a device in the mail. We are sending it FREE of charge. They may not look expensive but the technology in them was very expensive. You are getting a TYPE A Beta unit, a prototype. The technology is top drawer the casing it is in will not be. Don't let that dissuade you.

## **HOW DOES IS WORK?**

We recommend you wear it around your neck with the provided lanyard a minimum of 3-4 times a week for 30 days. You can run as many sessions as you like as it is impossible to overdose on frequencies. If your body doesn't need them, they pass through you untouched.

Your body is in essence, a large reservoir of water and will carry these waves throughout.

At the end of 30 days, you fill out a simple 10-min post survey online. There are no drugs or chemical involved in the study. The sign-up link is at the end of the orientation video.

Visit [Resona.News/future](https://Resona.News/future).

You keep the device free of charge.

People who have utilized this technology have reported statistically relevant decreases in issues. We'll share some individual anecdotal success stories in a moment, so you can understand the potential impact you may experience yourself.

## **What is Resonance?**

How does your microwave oven heat that slice of Pizza? The frequency of that microwave radiation resonates with water molecules. It makes the water molecule spin on its own axis, which causes friction. Like rubbing your hands together, the friction creates heat.

When you press the key fob to your car or click the garage door opener, why does it open your car door and garage door and not the neighbors? Because it resonates specifically with yours and no one else's.

When you tune your radio to 103.5 FM, why do you hear that station and only that station? Because your receiving antenna is resonating perfectly with the transmission antenna back at the station.

Your body and the cells react similarly, and it is key to how frequency therapies work. The frequencies resonate with your body in two ways. There are specific frequencies for the tissue (back, elbow, liver, knee, etc.) and what is wrong with it (nerve damage, muscle soreness, inflammation, etc.)

Naturally occurring magnetic fields are all around us and all living (and non-living) things on the planet Earth are engulfed in it. The Earth creates continuous low energy magnetic frequencies similar to our device, so these low energy frequencies are proven safe.

### **Why haven't you heard of it?**

This technology is not new. The frequencies have been around for over 100 years.

“Alternative and Complementary Medicine are just plain Voodoo. If there were anything to it, my doctor would have told me about it, right?”

No

Unfortunately, there are many areas of care and wellness that your doctor was never trained on in med school. Some fundamentals, like nutrition, are simply not taught in most medical schools. Another reason is money. 75% of the FDA's research budget is funded by Big Pharma and they make their profits by selling drugs not invisible frequencies.

## **Success Stories**

### *Organs*

In a small study on Asthma, 10 out of 10 people saw an improvement in "ease of breathing" based on the Asthma.com clinical test score after 30 days. Most reported breathing better in just 1 or 2 sessions. One participant who is a lifelong sufferer from Asthma, a smoker, who lives in the middle of a cedar farm in Texas, called our office with tears in his eyes after just one session. "I haven't breathed this well in 30 years".

Another diabetic who ran our Insulin Resistance protocol reduced the number of daily insulin injections from 80 to just 10 units while simultaneously dropping his blood sugar from 200 mg/dl to just 80 mg/dl.

So, we have some great indicators that the frequencies work well for various organs.

## *Pain*

The frequencies have been shown to dramatically reduce pain with many people. We have seen great success with back and neck pain as well as Fibromyalgia. In fact, these frequencies are one of the few things in the medical world to reduce full body Fibromyalgia pain.

## *Viruses*

If you have ever had cold sores or shingles, you know its no picnic. The frequencies have been shown to clear up shingles and cold sores in 48 hours. Also, it can dramatically reduce the severity of cold and flu symptoms as well as the duration.

## *Emotional Factors*

Emotional factors are the most cutting-edge application of these frequencies. Anxiety ad Depression are all too common and we have seen good results with the frequencies here as well. In a recent small study for PTSD, 10 out 10 saw a reduction in PTSD Symptoms in 30 days.

Does this all seem too good to be true?

Maybe. That is why we want to expand the PTSD study to at least 100 people. With 100 people we can get clinically and significantly valid results.

To tackle PTSD without any drugs or chemicals would be one of the best things that could happen to medicine. Well maybe not from Big Pharma's point of view, but for the rest of us – hell yes.

If you suffer from PTSD, join our 30-day study. Relief is just around the corner.

You can take the next step and apply to get your own device for free at the links below. Please remember this is a serious investment for us and we are happily sharing this technology only with individuals who are willing to follow through and report back their honest experience.

Thank you.

Click "Get Started" to watch the 10 - minute orientation video. The link to a simple pre-survey will be at the end of the video, then your Pulsar XO will ship today. You are only 20 minutes away from life-changing relief.
